

We've made it easier to manage your MetLife benefits

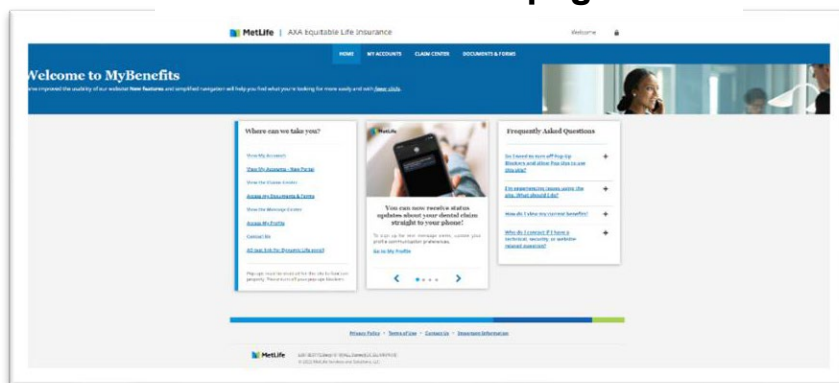

As part of MetLife's continued commitment towards enhancing your online experience, we are excited to announce the launch of our redesigned MyBenefits homepage! This is one of several steps we are taking to provide you with a more seamless product servicing experience.

Our goal is to increase satisfaction and productivity by delivering an easy-to-use homepage experience.

Let's walk through some enhancements:

- ▶ Navigation has been expanded to include detailed explanations of what you'll find as you navigate throughout the site.
 - **Benefits and Coverage** will direct you to a simple dashboard where you can view essential benefits, coverage information, product details, and more.
 - The **Claim Center** now allows you to digitally file, view or submit claims as needed.
 - **Documents & Forms** provides an all-in-one repository for you to access product-related documentation and download or complete forms.
- ▶ General website links are now called **Shortcuts**, designed to help you complete specific tasks in a faster and more efficient manner uniquely customized to your products.
- ▶ We added an **Additional Benefits for You** section, where you'll gain a better understanding of your eligibility for certain products and services.
