

Nationwide Ground & Air Ambulance Plans

No matter who picks you up or where you are, we eliminate your out-of-pocket costs for medical evacuation and more

No one should need to pay to **access life-saving care** in a medical emergency

Over the past decade, the cost of medical transportation has outpaced insurance reimbursement rates by nearly 200% - leaving the patient to pay the balance.

As a result, families are often forced to factor these financially crippling expenses into their health care decision-making equation.

Close the **insurance gap** when it comes to emergency medical transportation

Most people have a false sense of security that their health insurance or Medicare protect them from the sky-high cost of medical transportation.

In reality, every year **over 50 million** patients will be billed **\$20,000 or more** for medical transportation - even after their health insurance pays.

This "gap" is due to plan deductibles and co-payments, out-of-network charges, and partial or complete claim denials.

Deductibles & Co-Payments

According to a CNN report, the average healthcare plan deductible and co-payment is more than \$17,000

Network Limitations

Approximately 79% of providers are out-of-network, reducing your coverage and increasing your out-of-pocket cost

Coverage Denials

200+ million claims are denied annually due to medical necessity, unc customary charges, and other limitations
